- The SLC-500 instruction set is very close to the original PLC-5 processors. In general, the SLC-500 programming software has a few less features than the PLC-5 programming software. The major differences that you will see are:
- The I/O configuration must be specified before downloading the initial project and going on-line.
- Only the SLC 5/04 and 5/05 support on-line editing. For all others, one must edit ladder off-line and download changed program to PLC.

How to Connect to an Allen-Bradley SLC 500 PLC. With most modern PLCs, all you need to start programming or troubleshooting is to plug in your laptop with a plain old ethernet cable. Older PLCs, however, tend to use a myriad of different cables and protocols. With a large number of legacy systems, the original programming cables and software are often long lost by the time you want to make updates or need to troubleshoot an issue.
