~~Probability Practice Questions Corbettmaths~~

Probability Questions with Solutions. Tutorial on finding the probability of an event. In what follows, S is the sample space of the experiment in question and E is the event of interest. $n(S)$ is the number of elements in the sample space S and $n(E)$ is the number of elements in the event E.

~~Probability Questions with Solutions~~

To answer this one we need to go to the basic definition of a median. Median is the value which has roughly half the values before it and half the values after. The number of values less than 25 are $(36+54+69 = 159)$ and the number of values greater than 30 are $(55+43+25+22+17= 162)$. So the median should lie somewhere between 25 and 30.
