Excerpt. This study deals with the condition of the science of politics as it is known in the United States today and with the relation to it of general political theory, both moral and causal. In earlier centuries a student of political systems would have been hard put to distinguish his theoretical inquiries from his general political research. Today in the United States, however, it has become increasingly difficult to appreciate why

Most political scientists adhere to a simple model of scientific inquiry when building theories. The key to building precise and persuasive theories is to develop and test hypotheses. Hypotheses are statements that researchers construct for the purpose of testing whether or not a certain relationship exists between two phenomena.
