These "saviors" pose absolutely no constructive ideas of their own to resolve the morass in which our country now finds itself. The politicians think no farther than getting themselves elected or re-elected. The lure of \$100,000 in lecture fees is a powerful aphrodisiac. The lure of power, the is an even greater aphrodisiac. If the public starts putting two and two together and the answer should come out "four." But so far, the "average" American can still be led to believe that $2+2$ equals whatever number the spin masters want to make it. What is even worse, more than 40% of Americans are buying into the politics of fear, dissension, and abuse without stopping for even a moment to consider exactly what these political hatemongers are offering in exchange for turning one faction out and securing the benefits of power for themselves. But regardless of political infighting or outfighting, what we are doing is akin to two fleas

This book examines the complex relationship between politics and hate speech laws, domestic and international. How do political contexts shape understandings of what hate speech is and how to deal with it? Why do particular states enact hate speech laws and then apply, extend or reform them in the ways they do? What part does hate speech play in international affairs? Why do some but not all states negotiate, agree and ratify international hate speech frameworks or instruments? What are some of the

best and worst political arguments for and against hate speech laws? Do political figures have special moral duties to refrain from hate speech? Should the use of hate speech by political figures be protected by parliamentary privilege? Should this sort of hyperpolitical hate speech be subject to the laws of the land, civil and criminal? Or should it instead be handled by parliamentary codes of conduct and procedures or even by political parties themselves? What should the codes of conduct look like? Brown and Sinclair answer these important and overlooked questions on the politics of hate speech laws, providing a substantial body of new evidence, insights, arguments, theories and practical

In the United States, people are deeply divided along lines of race, class, political party, gender, sexuality, and religion. Many believe that historical grievances

must eventually be left behind in the interest of progress toward a more just and unified society. But too much in American history is unforgivable and cannot be forgotten. How then can we imagine a way to live together that does not expect people to let go of their entrenched resentments? *Living with Hate in American Politics and Religion* offers an innovative argument for the power of playfulness in popular culture to make our capacity for coexistence imaginable. Jeffrey Israel explores how people from different backgrounds can pursue justice together, even as they play with their divisive grudges, prejudices, and desires in their cultural lives. Israel calls on us to distinguish between what belongs in a

raucous “domain of play” and what belongs in the domain of the political. He builds on the thought of John Rawls and Martha Nussbaum to defend the liberal tradition against challenges posed by Frantz Fanon from the left and Leo Strauss from the right. In provocative readings of Lenny Bruce’s stand-up comedy, Philip Roth’s Portnoy’s Complaint, and Norman Lear’s All in the Family, Israel argues that postwar Jewish American popular culture offers potent and fruitful examples of playing with fraught emotions. *Living with Hate in American Politics and Religion* is a powerful vision of what it means to live with others without forgiving or forgetting.

Politics was once a term with an array of broadly positive connotations, associated with public scrutiny, deliberation and accountability. Yet today it is an increasingly dirty word, typically synonymous with duplicity, corruption, inefficiency and undue interference in matters both public and private. How has this come to pass? Why do we hate politics and politicians so much? How pervasive is the contemporary condition of political disaffection? And what is politics anyway? In this lively and original work, Colin Hay provides a series of innovative and provocative answers to these questions. He begins by tracing the origins and development of the current climate of political disenchantment across a broad

range of established democracies. Far from revealing a rising tide of apathy, however, he shows that a significant proportion of those who have withdrawn from formal politics are engaged in other modes of political activity. He goes on to develop and defend a broad and inclusive conception of politics and the political that is far less formal, less state-centric and less narrowly governmental than in most conventional accounts. By demonstrating how our expectations of politics and the political realities we witness are shaped decisively by the assumptions about human nature that we project onto political actors, Hay provides a powerful and highly distinctive account of contemporary political disenchantment. Why do we know every gory crime scene detail about such victims as Matthew Shepard and James Byrd Jr. and yet almost nothing about the vast majority of other hate crime victims? Now that federal anti-hate-crimes laws have been passed, why has the number of these crimes not declined significantly? To answer

such questions, Clara S. Lewis challenges us to reconsider our understanding of hate crimes. In doing so, she raises startling issues about the trajectory of civil and minority rights. *Tough on Hate* is the first book to examine the cultural politics of hate crimes both within and beyond the law. Drawing on a wide range of sources—including personal interviews, unarchived documents, television news broadcasts, legislative debates, and presidential speeches—the book calls attention to a disturbing irony: the sympathetic attention paid to certain shocking hate crime murders further legitimizes an already pervasive unwillingness to act on the urgent civil rights issues of our time. Worse still, it reveals the

What is the opposite of hate? As a progressive commentator on Fox News and now CNN, Sally Kohn has made a career out of bridging intractable political differences and learning how to talk respectfully with people whose views she

disagrees with passionately. Her viral TED Talk on the need to practice emotional—rather than political—correctness sparked a new way of considering how often we amplify our differences and diminish our connections. But these days even famously “nice” Kohn finds herself wanting to breathe fire at her enemies. It was time, she decided, to look into the epidemic of hate all around us and learn how we can stop it. In *The Opposite of Hate*, Kohn talks to leading scientists and researchers and investigates the evolutionary and cultural roots of hate and how incivility can be a gateway to much worse. She travels to Rwanda, the Middle East, and across the United States, introducing us to former terrorists and white

supremacists, and even some of her own Twitter trolls, drawing surprising lessons from dramatic and inspiring stories of those who left hate behind. As Kohn confronts her own shameful moments, whether it was back when she bullied a classmate or today when she harbors deep partisan resentment, she discovers, "The opposite of hate is the beautiful and powerful reality of how we are all fundamentally linked and equal as human beings. The opposite of hate is connection." Sally Kohn's engaging, fascinating, and often funny book will open your eyes and your heart.

Horror films have traditionally sunk their teeth into

straitened times, reflecting, expressing and validating the spirit of the epoch, and capitalising on the political and cultural climate in which they are made. This book shows how the horror genre has adapted itself to the transformation of contemporary American politics and the mutating role of traditional and new media in the era of Donald Trump's Presidency of the United States. Exploring horror's renewed potential for political engagement in a socio-political climate characterised by the angst of civil conflict, the deception of 'alternative facts' and the threat of nuclear or biological conflict and global warming, *Make America Hate Again* examines the intersection of film, politics, and American culture and society

through a bold critical analysis of popular horror (films, television shows, podcasts and online parodies), such as 10 Cloverfield Lane, American Horror Story, Don't Breathe, Get Out, Hotel Transylvania 2, Hush, It, It Comes at Night, South Park, The Babadook, The Walking Dead, The Woman, The Witch and Twin Peaks: The Return. The first major exploration of the horror genre through the lens of the Trump era, it investigates the correlations between recent, culturally meaningful horror texts, and the broader culture within which they have become gravely significant. Offering a rejuvenating, optimistic, and positive perspective on popular culture as a site of cultural politics, Make America Hate Again will
