Psychological Foundations of Education presents some of the principles of psychology that are relevant to learning and teaching. It presents an alternative answer to the problem of the bifurcation of general and educational psychology in the curriculum of teacher preparation. While the solution is provisional and has obvious imperfections, it is offered in the hope that it may stimulate discussion of the problem and other solutions and/or explicit justifications for past practice. Key concepts discussed include teachers' attitudes and behavior, different types of learning, technology in education, forgetting and extinction, child development, and intelligence measurements. Also covered are the assessment of educational achievement, the social psychology of the classroom, and education in urban schools. This text should have a variety of uses in classes where students are preparing for teaching. It was written specifically for those situations in which the prospective teacher is introduced to psychology through a one- or two-semester integrated sequence.

The Foundations of Remembering presents a collection of essays written by top memory scholars in honor of Henry L. Roediger III. The chapters were originally delivered as part of the "Roddyfest" conference held in March 2005 to celebrate Purdue University's awarding of an honorary doctor of letters to Roediger in recognition of his many contributions to the field of psychology. Authors were given a simple charge: choose your own topic, but place your work in historical context. Roediger is fascinated by the intellectual lineage of ideas, so addressing historical "foundations" seemed a fitting tribute. The Chapters contained in this volume help to establish the foundations of remembering, circa the first decade of the 21st century, as perceived by some of the leading memory researchers in the world. Not surprisingly, each of the chapters touches on Roediger's research as well, largely because his work has helped to define and clarify many topics of interest to the memory field. The Foundations of Remembering is intended for a wide audience: students, scholars, and anyone interested in exploring the historical and conceptual roots of modern memory theory.

All the world's a stage--and nowhere is that more true than at an all-girls high school, particularly one where a scandal has just erupted. A teacher has had an affair with his underage student, and though her friends pretend to be dismayed, they are secretly curious and jealous. They obsessively examine the details of the affair under the watchful eye of their stern and enigmatic saxophone teacher, whose focus may not be as strictly on their upcoming recital as she implies. When the local drama school turns the story of the scandal into their year-end show, the real world and the world of the theater are forced to meet. With both performances--the musicians' and the acting students'--approaching, the boundaries between dramas real and staged, private and public, begin to dissolve. THE REHEARSAL is a tender portrait of teenage yearning and adult regret, an exhilarating, darkly funny, provocative novel about the complications of human desire. !--EndFragment--

Originally published in 1976, this volume is based on a conference held in 1974. The purpose of the conference was to foster communication between those researchers studying habituation or closely related processes in children and those studying habituation at the level of neurophysiology and animal behaviour. Within each of these groups there was burgeoning interest in habituation, yet there had been little, if any, interaction between them. Overall, this volume provides a medium for cross-fertilization between animal-neurophysiological and developmental research on habituation, highlighting some of the current empirical and theoretical concerns within each area at the time. While other volumes may have provided more comprehensive and detailed reviews of aspects of habituation, the juxtaposition of developmental and animal neuro-physiological research provided in this text was unique in the literature at the time.

This book provides a whole year's worth of activities and ideas complete with artwork and visual aids. These sixty-four outlines have been developed and used in an Anglican parish (Church of England) over the last eight years by a professional educator, artist, and experienced children's minister. The worship outlines include simple children's liturgies and a complete lesson or story plan that harmonizes with the lectionary. Through fun ideas, children encounter a real aspect of the Christian faith focused on a theme from each Sunday's Gospel.
