O Level Computer Science 2210 Past Papers March, May ...
 Past exam papers. Here are past papers for the Computer Science Tripos and Diploma in Computer Science from 1993 onwards. They incorporate any corrections made after the original papers had been printed. Solution notes are available for many past questions. They were produced by question setters, primarily for the benefit of the examiners.

Over the past two decades, projects supported by the International Development Research Centre (IDRC) have critically examined the ways in which information and communications technologies (ICTs) can be used to improve learning, empower the disenfranchised, generate income opportunities for the poor, and facilitate access to healthcare in Africa, Asia, Latin America and the Caribbean. Considering that most development institutions and governments are currently attempting to integrate ICTs into their practices, it is an opportune time to reflect on the research findings that have emerged from IDRC's work and research in this area. 'Connecting ICTs to Development' discusses programmatic investments made by IDRC in a wide variety of areas related to ICTs, including infrastructure, access, regulations, health, governance, education, livelihoods, social inclusion, technical innovation, intellectual property rights and evaluation. Each chapter in this book analyzes the ways in which research findings from IDRC-supported projects have contributed to an evolution of thinking, and discusses successes and challenges in using ICTs as tools to address development issues. The volume also presents key lessons learned from ICT4D programming and recommendations for future work.

Betrayal in the City, first published in 1976 and 1977, was Kenya's national entry to the Second World Black and African Festival of Arts and Culture in Lagos, Nigeria. The play is an incisive, thought-provoking examination of the problems of independence and freedom in post-colonial African states, where a sizeable number of people feel that their future is either blank or bleak. In the words of Moses, one of the characters: "It was better while we waited. Now we have nothing to look forward to. We have killed our past and are busy killing our future."--Page 4 of cover.

This World Bank report is a rich compilation of information on teaching learning materials (TLM) in Africa based on the extensive and multi-faceted experience of the author's work in the education sector in Africa. The study examines a wide range of issues around TLM provision including curriculum, literacy and numeracy, language of instruction policy, procurement and distribution challenges, TLM development and production and their availability, management and usage in schools. It also looks at the role of information and communication technology (ICT) based TLMs and their availability. The study recognizes that improved TLM system management is a critical component in achieving affordable and sustainable TLM provision for all students. This study, which draws from more than 40 Anglophone, Francophone, Lusophone, and Arabic-speaking countries will be particularly useful for policymakers, development partners, and other stakeholders attempting to understand the wide range of issues surrounding the complexity of textbook provision in Sub Saharan Africa.

Teaching Statistics in School Mathematics-Challenges for Teaching and Teacher Education results from the Joint ICM/IASE Study Teaching Statistics in School Mathematics: Challenges for Teaching and Teacher Education. Oriented to analyse the teaching of statistics in school and to recommend improvements in the training of mathematics teachers to encourage success in preparing statistically literate students, the volume provides a picture of the current situation in both the teaching of school statistics and the pre-service education of mathematics teachers. A primary goal of Teaching Statistics in School Mathematics-Challenges for Teaching and Teacher Education is to describe the essential elements of statistics, teacher's professional knowledge and their learning experiences. Moreover, a research agenda that invites new research, while building from current knowledge, is developed. Recommendations about strategies and materials, available to train prospective teachers in university and in-service teachers who have not been adequately prepared, are also accessible to the reader.

The first edition of Instructional Supervision: Applying Tools and Concepts was highly regarded by both professors and students for its practicality and its - coverage of tools & strategies to help supervisors work effectively with teachers.- up-to-date approach to clinical supervision which includes teacher portfolios, action research, peer coaching, and other innovative practices.- authentic case studies, classroom examples, field experiences, prompts for reflection, and pragmatic tips.The second edition retains all of these features and goes further by offering - a comprehensive collection of classroom observation tools.- a new chapter on confronting marginal teaching.- expanded coverage of professional development & its link to teacher evaluation.- extended ELCC-based self-assessment activities for students to help them master the entire cycle of clinical supervision and the development of professional growth plans.

Best Practices in Engaging Online Learners Through Active and Experiential Learning Strategies is a practical guide for all instructors and instructional designers working in online or blended learning environments who want to provide a supportive, engaging, and interactive learner experience. This book explores the integration of active and experiential learning approaches and activities including gamification, social media integration, and project- and scenario-based learning, as they relate to the development of authentic skill-building, communication, problem-solving, and critical-thinking skills in learners. Readers will find guidelines for the development of participatory peer-learning, cooperative education, and service learning opportunities in the online classroom. In addition, the authors provide effective learning strategies, resources, and tools that align learner engagement with course outcomes.

Each topic is treated from the beginning, without assuming prior knowledge. Each chapter starts with an opening section covering an application. These help students to understand the relevance of the topic: they are motivational and they make the text more accessible to the majority of students. Concept Maps have been added, which together with Summaries throughout, aid understanding of main ideas and connections between topics. Margin points highlight key points, making the text more accessible for learning and revision. Checkpoints in each chapter test students' understanding and support their private study. A selection of questions are included at the end of each chapter, many form past examination papers. Suggested answers are provided in the Answers Key.

An anthology designed for the enjoyment and instruction of students from junior-secondary school onwards. The poems focus on aspects central to African life and culture: lover, identity, death, village life, separation, power and freedom. Guidance for teachers is included.
