Cambridge International AS and A Level Business Revision Guide helps students apply their knowledge, understanding and skills to succeed in their course. This endorsed Cambridge International AS and A Level Business Revision Guide has been designed to further develop students' skills for the Cambridge International AS and A Level Business course. Revised to meet the latest syllabus (9609) this book is packed full of guidance to reinforce students' understanding and skills to succeed in their course. Written by experienced examiners this Revision Guide is perfect for international learners and accompanies the Cambridge International AS and A Level Business Coursebook (third edition).

High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. " This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as " the diploma disease † ? takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog. † ? Angela W. Little, Professor Emerita, Institute of Education, University College London " This book is very well structured and written and draws on the authors' remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings. † ? Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning " I am sure that Public Examinations Examined, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations. † ? Victor Bolotov, Distinguished Professor, Higher School of Economics, National

Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation

Over the past two decades, projects supported by the International Development Research Centre (IDRC) have critically examined the ways in which information and communications technologies (ICTs) can be used to improve learning, empower the disenfranchised, generate income opportunities for the poor, and facilitate access to healthcare in Africa, Asia, Latin America and the Caribbean. Considering that most development institutions and governments are currently attempting to integrate ICTs into their practices, it is an opportune time to reflect on the research findings that have emerged from IDRC ' s work and research in this area. " Connecting ICTs to Development " discusses programmatic investments made by IDRC in a wide variety of areas related to ICTs, including infrastructure, access, regulations, health, governance, education, livelihoods, social inclusion, technical innovation, intellectual property rights and evaluation. Each chapter in this book analyzes the ways in which research findings from IDRC-supported projects have contributed to an evolution of thinking, and discusses successes and challenges in using ICTs as tools to address development issues. The volume also presents key lessons learned from ICT4D programming and recommendations for future work.

Language, Literacy, and Learning in Primary Schools is a synthesis of the findings arising from four years of policy research and development in Nigeria's primary schools that focused on the gap between what teachers should know and be able to do, and the realities of teaching and learning in classrooms. It begins by critically examining the outcomes of primary schooling as measured by learning achievement results from national assessments, and by identifying some core learning problems for Nigerian primary school children. It reviews the findings from recent research reports that studied teaching and learning processes in primary school classrooms, and it identifies the pedagogical issues in primary classrooms that contribute to poor learning achievements. This report describes a research and development program that set out to improve teaching and learning in core learning skill areas of the curriculum. This study identifies priority areas for teachers' professional development. It suggests a policy framework for the continuing professional development of primary school teachers, including the initial preparation of teachers and their induction into teaching. It proposes medium and long-term strategies to bring about the desired changes in teaching and learning through school-based approaches to teacher development.

This World Bank report is a rich compilation of information on teaching learning materials (TLM) in Africa based on the extensive and multi-faceted experience of the author's work in the education sector in Africa. The study examines a wide range of issues around TLM provision including curriculum, literacy and numeracy, language of instruction policy, procurement and distribution challenges, TLM development and production and their availability, management and usage in schools. It also looks at the role of information and communication technology (ICT) based TLMs and their availability. The study recognizes that improved TLM system management is a critical component in achieving affordable and sustainable TLM provision for all students. This study, which draws from more than 40 Anglophone, Francophone, Lusophone, and Arabic-speaking countries will be particularly useful for policymakers, development partners, and other stakeholders attempting to understand the wide range of issues surrounding the complexity of textbook provision in Sub Saharan Africa.

This book diagnoses Cambodian teaching quality and presents policy options for reform.

Collins New GCSE Maths Homework Books are excellent companions to Collins New GCSE Maths Student Books. Following the familiar structure and layout of the Student Book, the Homework Book provides extensive practice of all the elements of the new curriculum at Grades G to C to ensure that your students achieve the best grades in mathematics. Collins New GCSE Maths EDEXCEL Linear Homework Book Foundation 1 is written by experienced teachers and examiners, and provides comprehensive practice for all the topics covered in Collins New GCSE Maths EDEXCEL Linear Student Book Foundation 1. It fully supports your students in learning the new 2010 GCSE Maths EDEXCEL specification and will ensure that they achieve the best grades:

- \* Provide excellent additional practice for all topics covered in the Student Book with brand-new questions not found in the Student Book
- \* Enable students to assess their own progress through each chapter with familiar colour-coded grades in every exercise

- \* Give students easy reference to the clear explanations and examples in their textbooks with a free CD-ROM of Collins New GCSE Maths EDEXCEL Linear Student Book Foundation 1 with every Homework Book

This new book provides a theoretical and practical guide to analysis of variance (ANOVA) for those who have not had a formal course in this technique, but need to use this analysis as part of their research. From their experience in teaching this material and applying it to research problems, the authors have created a summary of the statistical theory underlying ANOVA, together with important issues, guidance, practical methods, references, and hints about using statistical software. These have been organized so that the student can learn the logic of the analytical techniques but also use the book as a reference guide to experimental designs, realizing along the way what pitfalls are likely to be encountered.

The book offers an overview of international examples, studies, and guidelines on how to create successful partnerships in education. PPPs can facilitate service delivery and lead to additional financing for the education sector as well as expanding equitable access and improving learning outcomes.

"This book is about the threats to education quality in the developing world that cannot be explained by lack of resources. It reviews the observed phenomenon of service delivery failures in public education: cases where programs and policies increase the inputs to education but do not produce effective services where it counts - in schools and classrooms. It documents what we know about the extent and costs of such failures across low and middle-income countries. And it further develops the conceptual model posited in the World Development Report 2004: that a root cause of low-quality and inequitable public services - not only in education - is the weak accountability of providers to both their supervisors and clients. The central focus of the book, however, is a new story. It is that developing countries are increasingly adopting innovative strategies to attack these problems. Drawing on new evidence from 22 rigorous impact evaluations across 11 developing countries, this book examines how three key strategies to strengthen accountability relationships in developing country school systems have affected school enrollment, completion and student learning. The book reviews the motivation and global

context for education reforms aimed at strengthening provider accountability. It provides the rationale and synthesizes the evidence on the impacts of three key lines of reform: (1) policies that use the power of information to strengthen the ability of clients of education services (students and their parents) to hold providers accountable for results; (2) policies that promote school-based management that increase schools' autonomy to make key decisions and control resources, often empowering parents to play a larger role; (3) teacher incentives reforms that specifically aim at making teachers more accountable for results, either by making contract tenure dependent on performance, or offering performance-linked pay. The book summarizes the lessons learned, draws cautious conclusions about possible complementarities across different types of accountability-focused reforms if they are implemented in tandem, considers issues related to scaling up reform efforts and the political economy of reform, and suggests directions for future work."
