This book is essential for academics that enter the field of higher education and training, as it focuses on preparing teachers and trainers to respond appropriately to student success challenges. Student success is a burning issue, both globally and locally. While student achievement is determined by a combination of factors, teachers and their teaching practices do matter. Higher education teachers are expected to fulfill different roles at different times, such as planning for curriculum implementation, mentorship and coaching, facilitating learning, resource development, and student assessment. Against this background the primary purpose of Empowering novice academics for student success: Wearing different hats is building the capacity of novice teachers and trainers to play an influential role in increasing student success throughput.

Fraud and Education gives an informative overview of cheating in examinations in the U.S. and foreign countries and of the current state of fraud in education and research. It differs however, from many popular treatises on the same subject, in that it is not intended as a blanket condemnation of American (or foreign) education. Instead of assigning blame for the prevalence of fraud, the authors point to such factors as growth in the number of persons engaged in education and research, pressures on individuals to succeed, improvements in communications (especially the Internet and e-mail), and in techniques of document reproduction.

Business Organizations, Second Edition is a pedagogically rich book that recaptures student engagement in the course without sacrificing basic rigor. The traditional coverage of most books in the field is retained, but modernized in reflecting the importance of unincorporated entities and small business counseling problems. Transaction-oriented problems put the student in the practice role of advising a variety of businesses. An expository approach provides clear context for cases. Features include flowcharts, connections boxes, self-testing exercises, an interspersed series of exercises on ethics for business lawyers, a glossary of terms, and sidebars on numerical concepts and skills. Through the use of side-bar explanations or otherwise, the chapters or major sections of chapters in the book stand alone, facilitating teaching in almost any order. An online supplement includes a "business concepts for lawyers" module to be assigned as an instructor desires, as well as a variety of sample documents to show students the actual materials that lawyers work with every day. New to the Second Edition: Major revisions to incorporate important statutory modifications: Book-wide revisions to incorporate 2016 Model Business Corporations Act amendments Book-wide revisions to incorporate amendments to the Revised Uniform Partnership Act and amendments to several other ALI model statutes for unincorporated entities, including the revisions made under the ALI's "harmonization project" Revisions to reflect significant changes in the exemptions from registration under the Securities Act of 1933 Updates to reflect the 2017 Tax Cuts and Jobs Act New cases, including Alexander v. FedEx and O'Connor v. Uber (dealing with the agency relationship of delivery companies and their drivers); Browning-Ferris Indus. (addressing the possibility of joint-employer status in situations involving temp agencies); and Salman v. U.S. (new decision of the Supreme Court having to do with insider trading) Newly written substantive materials, including an entirely new section on the "gig" economy, added to Ch. 4; and new material on the ability of shareholders to adopt bylaws affecting the management of business Shorter cases to bring down page length and respond to adopter requests Improved integration of the text and its online companion material Professors and students will benefit from: Modularity—achieved by keeping chapters short and self-contained—so that the book can be adapted to professors' different priorities Substantial material provided for free in an online supplement, to reduce overall student costs, including: A set of complete edited codes to support all readings in the casebook; and A module comprising a "business concepts for lawyers" guide, covering tax, accounting, financial and economic topics keyed directly to the book. Detailed, problem-focused treatment of unincorporated entity issues and special transactional problems in counseling small businesses Visual and pedagogical elements (including teaching and learning aids such as flow-charts and self-testing devices) that are designed to engage a generation of students and teachers accustomed to variety and visual appeal Special cross-referencing aids to emphasize connections among related topics An expository approach providing clear context for the traditional case material that also appears Easy-to-digest sidebar content intended to develop student numeracy strength in tax, accounting and other relevant concepts

"The lack of academic integrity combined with the prevalence of fraud and other forms of unethical behavior are problems that higher education faces in both developing and developed countries, at mass and elite universities, and at public and private institutions. While academic misconduct is not new, massification, internationalization, privatization, digitalization, and commercialization have placed ethical challenges higher on the agenda for many universities. Corruption in academia is particularly unfortunate, not only because the high social regard that universities have traditionally enjoyed, but also because students-young people in critical formative years-spend a significant amount of time in universities. How they experience corruption while enrolled might influence their later personal and professional behavior, the future of their country, and much more. Further, the corruption of the research enterprise is especially serious for the future of science. The contributors to Corruption in Higher Education: Global Challenges and Responses bring a range of perspectives to this critical topic"--

In a "brutally honest" memoir, a motivational speaker, military veteran, and cancer survivor reveals how hope can bring about positive change (Ernie Johnson, Jr., sportscaster TNT/TBS). Change: If I Can, You Can is the story of a man destined for as much turmoil as life can provide. Travis Angry created his identity through childhood rebellion, dropping out of school, being in the military, fighting cancer, marrying, divorcing, raising children as a single father, obtaining a college degree, writing a memoir, and working as a professional speaker. Angry's gift is showing others how to resolve fear. His mission is to help teenagers, parents, teachers, coaches, and youth group directors to understand their lives and use hope as a tool for positive change. "Travis' story will make you want to scream and shout. His perseverance and strength is truly inspiring! He is making a positive impact within his family and community. He is truly making a difference one page at a time." —Jordin Sparks, singer/actress

The book that inspired the major new motion picture Mandela: Long Walk to Freedom. Nelson Mandela is one of the great moral and political leaders of our time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. Since his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela has been at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's antiapartheid movement, he was instrumental in moving the nation toward multiracial government and majority rule. He is revered everywhere as a vital force in the fight for human rights and racial equality. LONG WALK TO FREEDOM is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela tells the extraordinary story of his life—an epic of struggle, setback, renewed hope, and ultimate triumph.

This volume collects a selection of contributions which has been presented at the 23rd Italian Workshop on Neural Networks, the yearly meeting of the Italian Society for Neural Networks (SIREN). The conference was held in Vietri sul Mare, Salerno, Italy during May 23-24, 2013. The annual meeting of SIREN is sponsored by International Neural Network Society (INNS), European Neural Network Society (ENNS) and IEEE Computational Intelligence Society (CIS). The book – as well as the workshop- is organized in two main components, a special session and a group of regular sessions featuring different aspects and point of views of artificial neural networks, artificial and natural intelligence, as well as psychological and cognitive theories for modeling human behaviors and human machine interactions, including Information Communication applications of compelling interest.
