Unit 1: Relationships Among Quantities
The first unit of Coordinate Algebra involves relationships between quantities. This unit builds on these earlier experiences by asking students to analyze and explain the process of solving an equation. Students will be provided with examples of real-world problems that can be modeled by writing an equation or inequality.

Unit 1: Relationships Between Quantities and Expressions 2. An irrational number is a real number that cannot be expressed as a ratio p/q such that p and q are both integers and q ≠ 0. Irrational numbers cannot be represented by decimals that stop or repeat. Examples: 3, √2, π. The sum of an irrational number and a rational number is always irrational. The
