The student's unit test grade will count toward his course grade. If we remove all the content he already knew and only include the content he might have found more challenging, we make the test much harder for him. It's not fair to high-performing students to make their tests harder than it would have been if they'd known nothing.

From one of America's most popular short story writers and an Academy Award nominee: the O. Henry Award-winning tale that inspired the movie *The Hunt*. A subject of mysterious rumors and superstition, the deserted Caribbean Island was shrouded in an air of peril. To Sanger Rainsford, who fell off a yacht and washed up on its shores, the abandoned isle was a welcome paradise. But unknown to the big-game hunter, a predator lurked in its lush jungles—one more dangerous than any he had ever encountered: a human. First published in 1924, this suspenseful tale “has inspired serial killers, films and stirred controversy in schools. A century on, the story continues to thrill” (*The Telegraph*). “[A] tense, relentless story of man-against-man adventure, in which the hunter Sanger Rainsford learns, at the hands of General Zaroff, what it means to be hunted.” —*Criterion*

Presents two real cases in which animals were carriers for disease that affects humans, and discusses how doctors uncovered the cause and attempted to stop the spread of the disease.

The autobiography of women's rights pioneer Elizabeth Cady Stanton—published for the 100th anniversary of women's suffrage—including an updated introduction and afterword from noted scholars of women's history Ellen Carol DuBois and Ann D. Gordon. *Eighty Years and More: Reminiscences 1815–1897*, is one of the great American autobiographies. There is really no other American woman's autobiography in the nineteenth century that comes near it in relevance, excellence, and historical significance. In 1848, thirty-three-year-old Stanton and four others organized the first major women's rights meeting in American history. Together with Susan B. Anthony, her partner in the cause, she led the campaign for women's legal rights, most prominently woman suffrage, for the rest of the century. In those years, Stanton was the movement's spokeswoman, theorist, and its visionary. In addition to her suffrage activism, she was a pioneering advocate of women's reproductive freedom, and a ceaseless critic of religious misogyny. As the mother of seven, she also had pronounced opinions on women's domestic responsibilities, especially on raising children. In *Eighty Years and More*, Stanton reminisces about dramatic moments in the history of woman suffrage, about her personal challenges and triumphs, and about the women and men she met in her travels around the United States and abroad. Stanton's writing retains its vigor, intelligence, and wit. Much of what she had to say about women, their lives, their frustrations, their aspirations and their possibilities, remains relevant and moving today.

The author offers a chronicle of growing up in a small town in America's heartland, offering portraits of her family and her encounters with the complexities of the adult world, romance, and small-town life during the 1960s and 1970s.

I have found that in bicycling, as in other sports essayed by them, women and girls bring upon themselves censure from many sources. I have also found that this censure, though almost invariably deserved, is called forth not so much by what they do as the way they do it. It is quite natural to suppose, in attempting an unaccustomed exercise, that you have to do only what you see done and as others about you are doing. But to attain success in bicycling, as in other things, it is necessary to study the means as well as to look to the end to be attained, and to understand what must not be attempted as well as to know each step that will be an advance on the road to progress. A great deal has been said against attempting to study a little of anything; but when a slight knowledge of several important branches of science that bear directly upon a subject under consideration, and that a subject concerning the health and safety of many individuals, will render one intelligently self-dependent, and able at least to exercise without endangering one's own health or the lives of others, the acquisition of such knowledge should not be neglected.
