"If you are a teacher looking for a proven way to help and inspire more students, a coach searching for more effective practices to support teachers, or a school leader working to create positive, systemwide change, then this book is for you. It is a book of wish craft—a way to craft, or to make real, our most important wishes for our students." —From the foreword by Harvey F. Silver

How many times have you been stumped by a student's failure to learn? You tried everything in your tool kit, but nothing worked. Now what if there were a process that would help you pinpoint the student's specific need and design an action plan to swiftly remedy the problem? In *Solving Academic and Behavior Problems*, Margaret Searle and Marilyn Swartz offer just that. This process, based on the positive psychology of appreciative inquiry, builds on what is working with students to address what is not working. It's a system of support that helps general education teachers partner with specialists and parents to learn new ways to enrich academic, social-emotional, and behavioral growth through structured conversations and a series of productive meetings of 30 minutes or less. Using more than 25 video clips, Searle and Swartz walk you through the six basic steps of the appreciative inquiry problem-solving process: 1. Connect with team members and stakeholders. 2. Review the meeting focus/concern. 3. Share a story that details when you successfully addressed the concern. 4. Establish a goal using a concise "DATA" framework. 5. Design an action plan. 6. Commit to an action. The authors also outline how to use five whys to uncover hidden barriers to student achievement when learning isn't improving. Each chapter contains links to online video examples, activities, reflection questions, scenarios, handy tools, and tips from practitioners. A great resource to strengthen RTI and MTSS plans and invaluable to teachers, support staff, and administrators alike, *Solving Academic and Behavior Problems* provides the kind of insights and guidance that expand and sharpen educators' capacity to help all students learn.

The 100+ Series, Algebra, offers in-depth practice and review for challenging middle school math topics such as radicals and exponents; factoring; and solving and graphing equations. Common Core State Standards have raised expectations for math learning, and many students in grades 6–8 are studying more accelerated math at younger ages. As a result, parents and students today have an increased need for at-home math support. The 100+ Series provides the solution with titles that include over 100 targeted practice activities for learning algebra, geometry, and other advanced math topics. It also features over 100 reproducible, subject specific, practice pages to support standards-based instruction.

Architects must be proficient in a variety of business practices to contribute to, manage, or launch a successful firm. They are responsible for the same kind of legal, financial, marketing, management, and administrative activities as any other professional. Within these broad categories, however, there are many details, including professional standards and documents, that are unique to the profession of architecture.

Modeling Mathematical Ideas combining current research and practical strategies to build teachers and students strategic competence in problem solving. This must-have book supports teachers in understanding learning progressions that addresses conceptual guiding posts as well as students' common misconceptions in investigating and discussing important mathematical ideas related to number sense, computational fluency, algebraic thinking and proportional reasoning. In each chapter, the authors opens with a rich real-world mathematical problem and presents classroom strategies (such as visible thinking strategies & technology integration) and other related problems to develop students' strategic competence in modeling mathematical ideas.

The evaluation of student performance and knowledge is a critical element of an educator's job as well as an essential step in the learning process for students. The quality and effectiveness of the evaluations given by educators are impacted by their ability to create and use reliable and valuable evaluations to facilitate and communicate student learning. The Handbook of Research on Assessment Literacy and Teacher-Made Testing in the Language Classroom is an essential reference source that discusses effective language assessment and educator roles in evaluation design. Featuring research on topics such as course learning outcomes, learning analytics, and teacher collaboration, this book is ideally designed for educators, administrative officials, linguists, academicians, researchers, and education students seeking coverage on an educator's role in evaluation design and analyses of evaluation methods and outcomes.

A sensible, workable and practical approach for any teacher who wishes to understand and promote effective classroom inclusion for children with learning difficulties, focused on the realities of teaching.

This book, based on non-interactive question-and-answer format, offers an essential guide for medical students who need to prepare for oral exams or clinical visits. Starting from specific clinical situations the volume provides clear questions on the theory related to the cases. Each question is followed by correct answers that summarize the main information. Suggested reading are included to deepen the topics and enhance the readers knowledge. Accordingly, this practical guide will help students get ready for their oral exams, and help prepare young residents for their first clinical cases.
