Download this whitepaper to learn: The evolution of Ransomware and why businesses are being targeted more frequently~~

~~*Ransomware - A Growing Enterprise Threat*~~

~~Ransomware is a particularly pernicious form of malware that restricts an individual’s access to their computer (e.g., by encrypting their data) and demands payment to restore functionality. While the first documented ransomware attack dates back to 1989, ransomware remained relatively uncom-mon until the mid 2000s [26].~~
