Who Built That? Skyscrapers: An Introduction to ...

The design and decoration of skyscrapers have passed through several stages. Jenney and his protégé Louis Sullivan styled their buildings to accentuate verticality, with delineated columns rising from base to cornice. There was, however, some retention of, and regression to, earlier styles as well.

Skyscraper | building | Britannica

The term skyscraper was first applied to buildings of steel-framed construction of at least 10 storeys in the late 19th century, a result of public amazement at the tall buildings being built in major American cities like Chicago, New York City, Philadelphia, Detroit, and St. Louis.The first steel-frame skyscraper was the Home Insurance Building (originally 10 storeys with a height of 42 m or ...

Skyscraper - Wikipedia

The first skyscrapers—all commercial buildings with iron or steel frameworks—came about in the late 19th and early 20th centuries. The first skyscraper is generally considered to be the Home Insurance Building in Chicago, though it was only 10 stories high. Later, taller and taller buildings were made possible through a series of architectural and engineering innovations, including the ...

The History of Skyscrapers - ThoughtCo

Skyscrapers is a colorful tour of the world's tallest buildings and the larger-than-life personalities who built them. Beginning with a brief biographical sketch of each architect, illustrator Didier Cornille imaginatively depicts the construction of eight of the world's most impressive skyscrapers.

Who Built That? Skyscrapers: An Introduction to ...

The Flatiron Building, designed by Daniel Hudson Burnham and standing 285 ft (87 m) high, was one of the tallest buildings in New York City upon its completion in 1902, made possible by its steel skeleton. While it was never the world's tallest building, it was one of the first buildings designed with a steel framework, and to achieve this height with other construction methods of that time would have been very difficult.

Skyscraper - Wikipedia

The early skyscrapers were a range of tall commercial buildings built between 1884 and 1945, predominantly in the American cities of New York City and Chicago.Cities in the United States were traditionally made up of low-rise buildings, but significant economic growth after the Civil War and increasingly intensive use of urban land encouraged the development of taller buildings beginning in ...

Early skyscrapers - Wikipedia

A super-tall skyscraper designed by architect Omerò Marchetti as part of his proposed "ethic city" concept. The aims of the project are to reach a nautical mile in height while "not using concrete, orthogonal grids, traditional systems, mortars, [and] cranes." If built, the tower would reach 1,852 metres (6,076 ft). N/A
