War II, the Japanese established and maintained by bloody rule a puppet regime in the Chinese region of Manchuria. This region was composed of three northern provinces in China; the puppet ruler was the last Chinese Emperor, Pu Yi, and this rich industrial region was clearly coveted and managed by the Japanese as a critical element in their imperial dominion.

Yamamuro Shin'ichi's extraordinary book rereads this occupation under new light. The author shows that right-wing Japanese military and civilian groups thought of construction in this sparsely populated region as an effort to build a paradise on earth, with roots deep in Asian traditions. At the same time,

Chinese and Korean populations in the region were abused by the Japanese military, and many Japanese were deliberately misinformed about what was being done in their name.

Yamamuro examines the policies and events unfolding on the ground during this time. With close attention to the Chinese, Japanese, and Koreans involved, and the links between the military and the home islands, he offers his own overall assessment of this distinctive instance of state-building. Making use of numerous sources in Chinese and Japanese, from legal documents and government decrees to memoirs and poetry, *Manchuria Under Japanese Dominion* goes beyond rhetoric to provide a unique

The History of Korea presents a chronological account of Korea from ancient days, over 2000 B. C, to modern 20th century Korea. Hulbert said that Korea and Japan have the same two racial types, but Japan is mostly Malay and Korea is mostly Manchu-Korean. He claimed that Korea is physically mostly of the northern type, but also said that the nation, being physically mostly of the northern type, did not disprove Hulbert's claim that the Malay element developed Korea's first civilization, although not
